Profile

Proactive **Data Analyst** with a strong foundation in **Python, MySQL, Excel, Statistics, Tableau, and Power BI**. Skilled in performing **Exploratory Data Analysis (EDA)** to identify trends, patterns, and actionable insights. Passionate about leveraging data-driven techniques to support business decisions and optimize performance. Eager to apply analytical and visualization skills in a professional environment.

Projects

Thyroid And Cancer Risk Dashboard {Power Bi}

- Developed an interactive Power BI dashboard to analyze key thyroid health metrics and potential cancer risk factors across different countries, ethnicities, and family history data.
- Visualized key metrics like the average levels of T4, TSH, and T3 hormones, average nodule size (3 mm), and the count of diagnoses by country, highlighting the high diagnosis count in countries like India, China, and Nigeria.

Global Covid -19 Dashboard {Tableau}

- Developed an interactive Power BI dashboard to track and analyze the global impact of the COVID-19 pandemic, focusing on the progression of key measures and regional/country-level performance.
- Visualized the Comparison by Key Measures over time, highlighting that Active cases (9.31M) remain significantly high, and that the weekly Recovery increase (2.34M) is rapid, but the overall Recovery rate (62.4%) is only 12x higher than Deaths (5.55%).

Human Resource Dashboard {Excel}

- Developed an interactive Excel dashboard for comprehensive Human Resource analysis, visualizing key metrics across departments, job roles, and gender demographics.
- Provided a high-level overview of total resources, showing a Total Performance Rating of 41.7 and a Total Sum of Salary of \$69,200 (likely an average or truncated sum), along with a gender ratio indicating a slight majority of Females (53%) over Males (47%)

Netflix Data Analysis

- Conducted in-depth analysis of 8,800+ Netflix titles using a Python-based data science stack (Pandas for cleaning/transformation, Matplotlib/Seaborn for visualization) to uncover global content trends and strategic growth areas.
- Cleaned and visualized data to identify popular content demographics, confirming that Movies are more numerous than TV Shows, with USA and India being the primary production regions, and Dramas and Comedies dominating the genre landscape.

Loan Sanction Approval Data Analysis

- Loaded the file, identified missing data across six columns, and handled them using a mix of mode imputation and mean imputation.
- Performed both univariate (Histograms, Box Plots) and multivariate analyses (Correlation Heatmap, Scatter Plots) to visualize relationships, confirming key findings like the strong influence of Credit History and the direct correlation between Applicant Income and Loan Amount.

Education

Bachelor of Business Administration in Business Analytics

Chitkara University, Rajpura

Year of Graduation: 2025

Senior Secondary (Class 12, Commerce)

S.D. Vidya School, Ambala Cantt, Haryana

Year of Passing: 2022

Skills & Abilities

Technical Skills:

- Python
- Pandas
- NumPy
- Matplotlib
- Seaborn
- Power BI
- Tableau
- MS Excel
- MySQL

Analytical Skills:

- Data Cleaning
- Visualization
- Statistical Analysis
- Dashboard Design
- SQL Querying

Soft Skills:

- Attention to Detail
- Problem Solving
- Team Collaboration
- Creativity Skills.

Activities And Interests

- Data Visualization
- Statistical Analysis
- Machine Learning
- Exploring Open Datasets
- Attending Data Webinars
- Problem Solving
